

Why are we fighting to stop Dutra's factory?

An asphalt factory does not belong next to a Wetlands Park!

1. **It degrades a sensitive environment** with noise, lights, and diesel exhaust. Two 63 foot silos BLIGHT the scenic view corridor and the Gateway to Petaluma and Sonoma County.
2. **Asphalt production and diesel exhaust impact our health** with toxics that cause cancer, asthma and heart disease. PAHS (Blue Smoke), PM2.5 fine particulate matter, heavy metals, Hydrogen Sulfide, NOx, etc. Polluting exhaust from 150,000 diesel (24) ton diesel trucks per year to the site. Raises NOx levels above health limits.
3. **Dutra's factory will disrupt wildlife and park experience.** 24/7 hours of operation for government projects, flood lights, an 815 foot conveyor belt along the river from Shamrock's dock to the proposed Dutra factory.
4. **It hurts local businesses, tourism and home values** by creating noxious odors and blight at the Gateway to Petaluma and Sonoma County and at the adjacent Parks.
5. **Traffic congestion of hundreds of trucks per day** delaying commuter traffic.
6. **It ruins Shollenberger Park** as a peaceful, healthy park for rest and recreation.
